11th IUPAC International Congress of Pesticide Chemistry; 6-11 August 2006, Kobe, Japan

Technical Officer: Ian G. Ferris

The Congress will be held in Kobe, Japan, 6–11 August 2006. The theme “Evolution for Crop Protection, Public Health, and Environmental Safety,” aims to bring together scientists who study chemistry, biology, and environmental health issues to present technical achievements and exchange opinions about pesticide chemistry and bioscience. Keynote addresses and plenary lectures will give an overview of emerging agriculture, agrochemicals, and environmental health issues from different perspectives. Session lectures and posters will provide an update on topics of current scientific interest. Finally, the lunch-eon and evening seminars will provide a discussion platform to help participants understand the issues affecting agriculture, environmental, food safety, and corresponding regulations.
