

UN Decade for Action, “Water for Life”, 2005–2015

The United Nations proclaimed the period 2005–2015 as the Decade for Action, “Water for Life”, to achieve the Millennium Development Goals set in 2000.

The IAEA, through its Water Resources Programme, is responding to global water challenges, providing its Member States with science based information and the technical skills to understand and manage their water resources better.
