

Literature references

You are kindly asked to cite the **associated publication**. References and acknowledgements are available from the 'Literature Reference' field in the downloaded files. Please be aware that proper citation helps the researchers and institutes involved to affirm the importance of their work and contributions to GNIP/GNIR and that failure to properly cite data may undermine voluntary contributions to GNIP/GNIR.

Note: Participating institutes should be acknowledged, especially if there is no reference paper. Use e.g. the following example:

"We thank the [institute's name] staff in [location] for help with performing [the precipitation/river sampling | the measurements] at [station]."

Some collaborators have a specific form they wish their work to be acknowledged with. These are listed after the institute's name.
